

Solar Access Program

Introduction

Resonant Energy's Solar Access Program provides solar PV systems to homeowners and small businesses without requiring them to pay anything upfront or enter into binding financial obligations, such as a power purchasing agreement. We give preference to low and moderate income homeowners who would like to host systems, but all are welcome to apply.

How it Works

Where most solar developers require property owners to pay upfront or commit to long term purchasing agreements, we ask that you lease your roof to us so that we can finance and install a solar PV system on it. Instead of making lease payments to you in cash, we pay you with solar electricity produced by your roof's system and lower your power bills by up to 50%. The power we don't give to you we sell to community-based nonprofits.

YOUR HOUSEHOLD

- Saves 20-50% on your electricity bill
- Receives up to 20% of the output of the solar array
- Signs a rooftop lease; no purchase agreement

ANCHOR INSTITUTION

eg. Affordable Housing or Municipality

- Buys electricity at market or discounted rate
- Receives 80% of the output of the solar array
- Signs a power purchase agreement

Program Highlights

- Project Hosts are not required to make any payments.
- All Project Hosts receive power savings of at least 20%.
- Qualifying Project Hosts receive average annual power savings of at least 35%.
- The term of the roof lease is 20 years, with an option to extend to 25.
- Resonant Energy takes full responsibility for system operations and maintenance.
- Resonant Energy takes full responsibility for financing the system.
